## **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The rejections over Kaneko et al. taken in view of JP '926 have been withdrawn in response to Applicant's arguments, specifically that Kaneko et al. is directed to use of a water-resistant polyolefin resin-coated paper support while JP '926 is directed to use of a paper support. As argued by Applicant, the results achieved in JP '926 are achieved not only by the direction of cutting, but are also due to a specific critical thickness and stiffness of its paper support, and one would have expected different issues or problems when using a polyolefin resin-coated paper support versus a non-water resistant (uncoated) paper support. Therefore it is the Examiner's position that one skilled in the art would not have expected a polyolefin resin-coated paper support of Kaneko et al. to have achieved the same results when using cross direction cutting as those achieved in JP '926 for its paper support having a particular thickness and stiffness.

The prior art does not teach or fairly suggest a method of preparing an ink-jet recording material comprising a water-resistant polyolefin resin-coated paper support and at least one ink-receptive layer thereon, the ink-receptive layer(s) containing inorganic fine particles having an average primary particle size of 30 nm or less in an amount of 8 g/m2 or more and a hydrophilic binder, whereby the step of cutting to a sheet occurs before printing with a printer and cutting is performed such that a longitudinal direction of the ink-jet recording material is at a right angle to a flowing direction of the recording material at a time of coating the ink-receptive layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kirsten C. Jolley whose telephone number is 571-272-1421. The examiner can normally be reached on Monday to Wednesday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
